Llangollen Landfill - Delaware

January 19, 1977

Paul E. Ambrose, Chief
Delmarva-DC Section

3EN21

Larry Miller, Chief
Water Quality Monitoring Office 3SA60

In order to compare present effluent conditions of the recovery wells with the conditions found in January 1974, please change the recovery wells listed in my January 12, 1977, memorandum to you from wells 31, 28 and RWS to wells 29, 27 and RW3.

In addition, it has been recommended by Al Montague that samples be split with EPA's ORGD Athen Laboratory as they had run the original evaluation. It is also recommended that we split samples with State of Delaware as previously agreed to.

Please add PCB to list of materials to be checked.
